Aggregate DAX Functions

SUM, AVERAGE, MAX, MIN, COUNTROWS,
DISTINCTCOUNT, DIVIDE

Q1

What is the average discount percentage across all sales transactions?

```
1 Avg Discount (%) = AVERAGE(SalesTable[DiscountPct])
2 // What is the average discount percentage across all sales transactions?
```

Q2

What is the average quantity of items purchased in each order?

```
1 Avg Order Qty =
2 DIVIDE(
3     SUM(SalesTable[Quantity]),
4     COUNTROWS(SalesTable),
5     0)
6 // What is the average quantity of items purchased in each order?
```

Q3

What is the Average Order Value (AOV)?

```
1 Avg Order Value =
2 DIVIDE(
3     [Total Revenue],
4     COUNTROWS(SalesTable),
5     0)
6 // What is the Average Order Value (AOV)? → Same as "Avg Revenue"
```

Q4**What is the Average Profit earned per transaction?**

```
1 Avg Profit Per Transaction =  
2 DIVIDE(  
3     [Total Profit],  
4     COUNTROWS(SalesTable),  
5     0)  
6 // What is the Average Profit earned per transaction?
```

Q5**What is the average revenue generated from a single order?**

```
1 Avg Revenue = AVERAGE(SalesTable[SalesAmount])  
2  
3 // What is the average revenue generated from a single order?
```

Q6**How much revenue does the company earn from each customer on average?**

```
1 Avg Revenue Per Customer =  
2 DIVIDE(  
3     [Total Revenue],  
4     DISTINCTCOUNT(CustomersTable[CustomerID]),  
5     0)  
6 // How much revenue does the company earn from each customer on average?
```

Q7**What is the Average Sales Amount per Customer?**

```
1 Avg Sales Per Customer =  
2 DIVIDE(  
3     [Total Revenue],  
4     DISTINCTCOUNT(CustomersTable[CustomerID]),  
5     0)  
6 // What is the Average Sales Amount per Customer?
```

Q8**What percentage of total orders were cancelled?**

```
1 Cancellation Rate =  
2 var Cancelled_Orders =  
3 CALCULATE(  
4     COUNT(SalesTable[OrderStatus]),  
5     SalesTable[OrderStatus] = "Cancelled"  
6 )  
7 RETURN  
8 DIVIDE(Cancelled_Orders,[Total Order],0)  
9 // What percentage of total orders were cancelled?
```

Q9

What percentage of total revenue came from completed orders only?

```
1 Completed Order Revenue (%) =  
2 var Completed_Revenue =  
3 CALCULATE(  
4     [Total Revenue],  
5     SalesTable[OrderStatus] = "Completed")  
6  
7 RETURN  
8 DIVIDE(Completed_Revenue,[Total Revenue],0)  
9  
10 // What percentage of total revenue came from completed orders only?
```

Q10

What was the highest revenue generated from a single transaction?

```
1 Max Revenue = MAX(SalesTable[SalesAmount])  
2  
3 // What was the highest revenue generated from a single transaction?
```

Q11

What was the smallest transaction amount?

```
1 Min Revenue = MIN(SalesTable[SalesAmount])  
2  
3 // What was the smallest transaction amount?
```

Q12**What percentage of the total revenue is profit?**

```
1 Profit Margin (%) = DIVIDE([Total Profit],[Total Revenue],0)
2
3 // What percentage of the total revenue is profit?
```

Q13**What percentage of total orders were returned?**

```
1 Returned Order (%) =
2 var Returned_Order = CALCULATE(
3     [Total Order],
4     SalesTable[OrderStatus] = "Returned"
5 )
6
7 RETURN
8 DIVIDE(Returned_Order,[Total Order],0)
9

Q65

What is the Month-over-Month (MoM) Revenue Growth (%) compared to the previous month?

```
1 MoM Revenue Growth (%) =  
2 var Prev_month_revenue =  
3 CALCULATE(  
4     [Total Revenue],  
5     DATEADD(CalendarTable[Date],-1,MONTH)  
6 )  
7  
8 var MoM_Diff = [Total Revenue] - Prev_month_revenue  
9  
10 RETURN  
11 DIVIDE(  
12     MoM_Diff,  
13     Prev_month_revenue,  
14     0  
15 )  
16 // What is the Month-over-Month (MoM) Revenue Growth (%) compared to the previous month?
```

Q66

Calculate the Month-over-Month (MoM) Profit Growth (%).

```
1 MoM Profit Growth (%) =  
2 var prev_month_profit =  
3 CALCULATE(  
4     [Total Profit],  
5     DATEADD(CalendarTable[Date],-1,MONTH)  
6 )  
7  
8 var Mom_Diff = [Total Profit] - prev_month_profit  
9  
10 RETURN  
11 DIVIDE(  
12     Mom_Diff,  
13     prev_month_profit,  
14     0  
15 )  
16 // Calculate the Month-over-Month (MoM) Profit Growth (%).
```

Q67

Calculate the Quarter-over-Quarter (QoQ) Revenue Growth (%).

```
1 QoQ Revenue Growth (%) =  
2 var prev_Quarter_Revenue =  
3 CALCULATE(  
4     [Total Revenue],  
5     PREVIOUSQUARTER(CalendarTable[Date])  
6 )  
7  
8 var quarter_revenue_diff = [Total Revenue] - prev_Quarter_Revenue  
9  
10 RETURN  
11 DIVIDE(  
12     quarter_revenue_diff,  
13     prev_Quarter_Revenue,  
14     0  
15 )  
16 // Calculate the Quarter-over-Quarter (QoQ) Revenue Growth (%).
```

Q68

Calculate the Year-over-Year (YoY) Revenue Growth (%).

```
1 YoY Revenue Growth (%) =  
2 var prev_year_revenue =  
3 CALCULATE(  
4     [Total Revenue],  
5     SAMEPERIODLASTYEAR(CalendarTable[Date]))  
6 )  
7  
8 var year_revenue_diff = [Total Revenue] - prev_year_revenue  
9  
10 RETURN  
11 DIVIDE(  
12     year_revenue_diff,  
13     prev_year_revenue,  
14     0  
15 )  
16 // Calculate the Year-over-Year (YoY) Revenue Growth (%).
```

Q69

Calculate the Year-over-Year (YoY) Profit Growth (%).

```
1 YoY Profit Growth (%) =  
2 var prev_year_profit =  
3 CALCULATE(  
4     [Total Profit],  
5     DATEADD(CalendarTable[Date],-1,YEAR)  
6 )  
7  
8 var year_profit_diff = [Total Profit] - prev_year_profit  
9  
10 RETURN  
11 DIVIDE(  
12     year_profit_diff,  
13     prev_year_profit,  
14     0  
15 )  
16 // Calculate the Year-over-Year (YoY) Profit Growth (%).
```

Q70

Compare the current MTD Revenue against the MTD Revenue from the same period last year.

```
1 MTD Revenue vs LY MTD Revenue =
2 var current_MTD_revenue =
3 CALCULATE(
4     [Total Revenue],
5     DATESMTD(CalendarTable[Date])
6 )
7
8 var prev_MTD_revenue =
9 CALCULATE(
10    [Total Revenue],
11    DATESMTD(
12        SAMEPERIODLASTYEAR(CalendarTable[Date])
13    )
14 )
15 RETURN
16 current_MTD_revenue - prev_MTD_revenue
17 // Compare the current MTD Revenue against the MTD Revenue from the same period last year.
```

Q71

Compare QTD Profit against the same period last year.

```
1 QTD Profit vs LY QTD Profit =
2 var current_QTD_profit =
3 CALCULATE(
4     [Total Profit],
5     DATESQTD(CalendarTable[Date])
6 )
7 var prev_QTD_profit =
8 CALCULATE(
9     [Total Profit],
10    DATESQTD(
11        DATEADD(CalendarTable[Date],-1,YEAR)
12    )
13 )
14 RETURN
15 current_QTD_profit - prev_QTD_profit
16 // Compare QTD Profit against the same period last year.
```

Q72

Calculate the YTD Revenue Growth (%) compared with the same period last year.

```
1 YTD Revenue Growth (%) =  
2 var current_YTD_revenue =  
3 CALCULATE(  
4     [Total Revenue],  
5     DATESYTD(CalendarTable[Date])  
6 )  
7 var prev_YTD_revenue =  
8 CALCULATE(  
9     [Total Revenue],  
10    DATESYTD(SAMEPERIODLASTYEAR(CalendarTable[Date]))  
11 )  
12 RETURN  
13 DIVIDE(  
14     current_YTD_revenue - prev_YTD_revenue,  
15     prev_YTD_revenue,  
16     0  
17 )  
18 // Calculate the YTD Revenue Growth (%) compared with the same period last year.
```
